Education

University of Michigan

Bachelors of Computer Science BSE

Ann Arbor

Fall 2021 - Winter 2024

- GPA: 3.75
- Relevant Courses: Data Structures and Algorithms, Computer Security, Operating Systems, Web Systems, Computer Organization, Machine Learning, Computer Vision, Large Language Models, Discrete Math

Relevant Experience & Projects

Nutshell (WebFX)

Jr. Software Engineer → Software Engineer

Ann Arbor, Michigan

Mar 2025 - May 2026

MCP Server & OAuth

- Contributed to development of an MCP server providing secure external LLM access (ChatGPT, Claude) to internal CRM data via tool-based APIs across core CRM entities, unlocking context-aware LLM insights
- Co-designed and implemented an OAuth 2.0 authentication system for multi-tenant MCP integrations, enabling secure third-party access with token lifecycle management and instance-based authorization

LLM-Powered Reports

- Developed an LLM-powered reporting system that converts natural language prompts into structured CRM filter queries, enabling dynamic analytics without manual filter configuration
- Improved output reliability by engineering schema-grounded prompting with instance-specific CRM context and implementing a validation layer to correct date-related hallucinations

Aircall Integration

- Implemented Aircall integration enabling synchronization of call recordings, transcripts, and metadata into CRM activities via OAuth authentication and webhook event processing, including frontend configuration flows for managing user connections
- Designed asynchronous background processing pipeline for external call events, including transcription ingestion, AI-generated call summaries, and CRM activity creation

Dimensional Control Systems

Software Development Intern → Software Engineer

Troy, Michigan

Summer 2023 - Mar 2025

- Developed AI assistant using Retrieval-Augmented Generation (RAG) to improve onboarding and user support efficiency
- Implemented multilingual support in C++ improving accessibility for international customers and expanding global usability
- Migrated legacy SourceSafe codebase to Git, improving development workflows and collaboration

Storyverse

Developer

University of Michigan

Fall 2024

- Collaborated with a team of 8 to develop *Storyverse*, an AI-driven online learning platform aimed at delivering hyper-personalized educational experiences for young children
- Designed and managed the database architecture and implemented secure user authentication and account management with Firebase
- Developed end-to-end features like *Grammar Quiz* generation, from the React frontend to the FastAPI backend APIs to data storage

Programming Skills

- C++, Python, PHP, TypeScript, SQL, React, FastAPI, Flask, GraphQL, REST APIs, AWS, Firebase, OAuth, LLMs, RAG, PyTorch, Git
